

Slide Unit

NUE (Y pipe compressed air feed & vacuum pickup type)

- AC Servo driver model

Basic Specifications

Controller

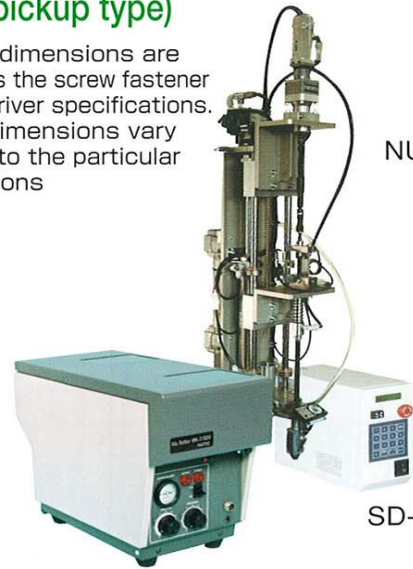

Shaft control	Screw tightener shaft
Drive method	AC servomotor
Screw tightening pattern	32 types
External I/O signals	Input 14 points Output 14 points

Primary power supply 100 VAC ($\pm 10\%$), 50/60 Hz

Options

- Screw floating detection
- Screw passing detection
- Vacuum OFF height alignment

- ※ Controller dimensions are the same as the screw fastener AC servo driver specifications.
- ※ Machine dimensions vary according to the particular specifications

NUE-A
