

Polyurethane Coating

NR-5S is a specially formulated two-component aliphatic urethane designed for spray application on all types of process equipment and other high wear and tear areas.

- Use conventional spray equipment
- Cures without the aid of heat
- Protects metal, plastic, cement, rubber, fiberglass and wood
- Corrosion and water resistance
- Excellent abrasion and chip resistance
- Noise reduction
- Superior aesthetic value
- Your colour code
- Reduced maintenance downtime
- Non-flammable shipping and storage
- Non-flammable application
- Decreased insurance premiums
- Low toxicity

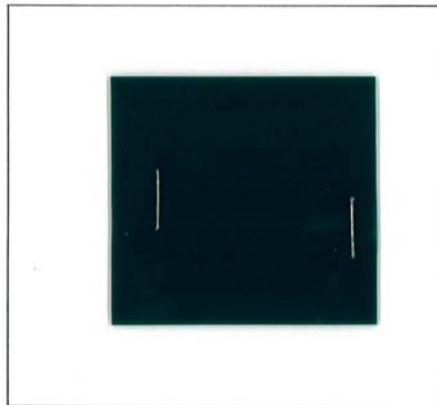

*Below is a cured free film sample of NR-5S
Sprayable Urethane Coating*

Features:

- ◆ 90 Shore "A" hardness
- ◆ Excellent abrasion and corrosion resistance
- ◆ Highly elastic and resilient
- ◆ Sprayable by air or airless equipment

*Below is a cured free film sample of BR-3S
Sprayable Urethane Coating*

Features:

- ◆ 80 Shore "A" hardness
- ◆ Excellent abrasion and corrosion resistance
- ◆ Highly elastic and resilient
- ◆ Sprayable by air or airless equipment
