S E R I E S

Feed-in-a-lot-type Automatic Screw Supplier

SAS-514-IIvFQ, 517-IIvFQ, 520-IIvFQ, 523-IIvFQ
526-IIvFQ, 530-IIvFQ, 540-IIvFQ, 550-IIvFQ

An automatic supplier that feeds you with screws in a specified lot at your finger touch

Designed for "walk-along screwing" on a large-size product assembly line, and best suits "small packaging" work as well.

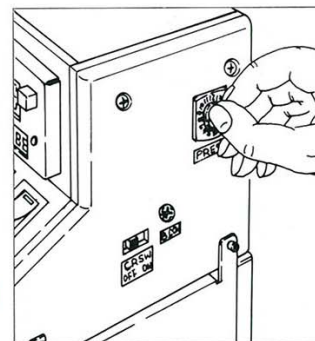

Features

- The size of a lot is variable from 1 through 15 in terms of the number of screws.
- Highly accurate counter.
- A finger touch at the lever gets you a feed of screws by the preset number.

Examples

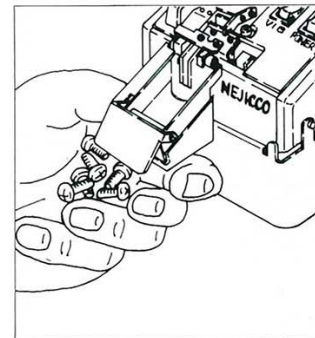

1

Set the Preset Knob to the number of screws you desire to be fed with in a lot.

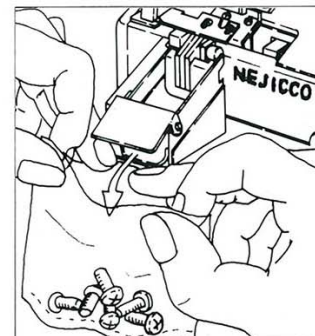

2

Hold your hand under the outlet with the palm up and push back the Feed Lever with your finger tip, then you will get the set number of screws in a lot.

3

For packaging, hold an open envelope under the outlet as illustrated and push the Feed Lever with your finger.
